ABOUT US

Innovation-backed Smart Consulting and Turnkey Solutions

ME Universal Engineering and Trading offers cutting-edge, innovative and customized project solutions to the commercial real estate and industrial sector.

An Independent Subsidiary of Abu Dhabi based Investment Group, ME Universal Engineering entered the Indian market in 2014 and since then has been catering to the design and installation needs of large corporate and commercial clients. It is also currently exporting to Middle Eastern markets as well.

Working with an extensive network of developers, builders, industry professionals and project partners across South India, ME Universal has built an reputation in the market for designing and delivering productivity-enhancing bespoke solutions for complex commercial projects.

Some of the clients worked for so far include Microsoft, Uber, Kotak Mahindra and Bata.

With a comprehensive set of brand affiliations, the company is strongly positioned to provide industry-leading products and solutions from top brands across application areas be it cleaning, energy, lighting or basic materials.

A Holistic Approach - Custom Design Through to Managing Installation

As your partner, our aim is helping you with project solutions that work - technically sound, cost effective and optimised for you.

ME Universal prides itself in offering an enviable portfolio of technologically advanced offerings, enabling the development of a customized solution with just the right products:

Wide Range of Products

Product categories include Commercial Lighting, Air Cooling & Ventilation, Central Vacuum & Cleaning among several others

Big-Picture Approach

Solutions are developed keeping in mind your project's goal and not simply the products available, so you receive what's best for your needs

Specialist Team

Our professionally-trained experts work closely with clients to understand their business and technical needs, to develop the best-possible solution

Additional Support

We offer a unique Extended Warranty solution, in which we offer after-care support via a qualified technical team helping you eliminate downtime

At ME Universal Engineering, we are dedicated to operational excellence having primary focus on innovative solutions, highest standards of delivery, and a customer-first policy.

With our expertise, you can rest assured that your project will receive the best-suited solution with no compromises on quality or efficiency.

Innovation-driven Productivity-Enhancing HighTech Solutions, Customized For You

COMPANY CAPABILITIES

For several years now, ME Universal Engineering and Trading has been serving the Indian market with its unique approach delivering project solutions in the commercial real estate and industrial sector.

Backed by a robust network of offices, manufacturing, assembling and warehousing facilities, we provide our clients with expert advice, high quality products and reliable support.

Corporate & Regional Offices

ME Universal Engineering and Trading headquartered in United Arab Emirates, with main operations and back support office in Hyderabad, India. We have a full fledged inhouse sales and technical team with live demonstration showroom studio for our clients to experience the solution themselves. ME Universal is working with project partners in North & Southern part of India and is expanding its wings in the Middle East, Africa and North American markets.

Experience Zones

We currently have Experience zones in Dubai and Hyderabad City and by 2019 we will be establishing showroom zones in Muscat, Jeddah, Nigeria, Tanzania and Canada. In these centres visitors will be able to get a deep understanding of the entire range of solutions available with us and their applications.

Technology Partner:

MICROSENS

NOVO™
LIGHTING

Manufacturing & Warehousing

ME Universal Engineering is having state of the Art factory in Hyderabad City and Wuxi City which is manufacturing Garbage Chutes & Bins as well as Central Vacuum and Air Purifier System with inhouse design, research and fabrication team with laser machines we can cater to any design or quantity as per any international standards acceptable to clients. We have our Assembling facility in Noida for the Lighting and Sensors which is in collaboration with our German Counterpart. Our Warehousing Facility is based in Hyderabad, Jebal Ali Port and Dubai Maritime City.

ME Universal Team

As an Integrated Solution Provider and Manufacturer, ME Universal has put together a highly experienced and professional team comprising of MEP Engineers, Technicians, Business Experts and Operational Support staff. A separate team works on UniCare division which is dedicated for AMC and after sales services to support our esteemed clients. Entire team of ME Universal are trained as per International standards for their respective job responsibilities.

CLIENTS WE ARE PROUD OF

Project Solutions Overview

PROJECT DESIGN & SMART CONSULTING

ME Universal Engineering and Trading works as your partner specializing in design, commissioning and installation services across a wide range of essential solutions for your commercial or industrial project.

We go beyond just offering products by bringing together a team of highly experienced professionals who have the technical expertise to develop just the right solution for you.

A Wide Range of Solutions

We currently offer products and expertise across

- ✓ Central Vacuum Cleaning
- ✓ Commercial & Industrial Lighting
- ✓ Air Cooling, Ventilation & Refrigeration
- ✓ Fire, Safety & Security
- ✓ Integrated Waste Management
- ✓ Sewage & Water Treatment
- ✓ Automation & Audio Visual
- ✓ Digital Signage & Way Finding

Our team comprises engineering and technical specialists who have handled successfully complex projects across several industries.

For us, the primary goal is offering innovative solutions that are optimal, cutting-edge, while being designed to enhance productivity and convenience.

Customized Solution for Your Business Needs

We develop a customized solution after fully understanding your business goals, design intent as well as building requirements or restrictions.

Our usual approach involves:

- A site visit which would involve understanding project goals and client priorities
- Develop design plans including product recommendations and installation approach
- Finalized the plan for installation after incorporating any client feedback
- Work with installing partners and ensure quality in the implementation process

What Sets us Apart from Others

Our unique approach to delivering client projects differentiates us from the remaining integrators in the market:

Tailored Solutions: As a one-size-fits all approach doesn't do justice to the unique demands of every project, we design solutions for each project individually

Experienced Team: Our management team has deep knowledge and experience in the field, resulting in speedy and high-quality decision making in complex projects

Smart Sourcing: By leveraging our expertise and our wide network we keep adding the best products and the latest technologies to our portfolio regularly

Risk Management Abilities: Our robust risk management practices ensure smooth delivery of even the toughest and most complex projects ensuring hassle free projects

Efficient Execution: Our singular focus on operational excellence ensures that projects are delivered on schedule and on budget, without compromising quality

INTELLIGENT BUILDING

Intelligent Building is about creating an asset with superior value in the marketplace. Goals are to generate revenue with a minimum of costs of operations and maintenance. Design and technology used is to create a building that is safer and more productive for its occupants and more efficient for its owners.

ME Universal Intelligent Design is focused on:

- ✓ Connecting building systems
- ✓ Connecting people and technology
- ✓ Connecting to the bottom line
- ✓ Connecting to the global environment
- ✓ Connecting to the smart power grid
- ✓ Connecting to an intelligent future

ME Universal Engineering focuses its Design right from plant-sized chiller systems to elevators to lighting, IoT-connected devices which will allow a shift from prevention and repair to conditions-based maintenance in real-time, in this way companies can save approximately 15% of their capital asset spend by focusing on optimizing existing building assets and prioritizing maintenance.

Our Smart Intelligent Features Cover:

- HVAC, Access & Fire Controls
- Intelligent Building Management Systems
- Wireless & Assistive Technologies
- Digital Infrastructure & Remote Monitoring
- Adaptive Energy Systems
- Programmable Lighting Control
- A/V & IP TV/Video System
- De-Centralized equipment & Converged IT network

IP500 - Wireless Platform

ME Universal Engineering is the integrator for IP500 Eco-system which works on open, non-proprietary, high-performance wireless communication platform. IP500 is the only wireless technology standard to ensure maximum interoperability by using and supporting the main industry norms and by clearly specifying all interfaces.

IP500 solutions ensure robust, uninterrupted, wireless communication between security-relevant building automation components, including:

- ✓ Access control and safety locks
- ✓ Fire and smoke alarms
- ✓ Emergency exits
- ✓ Break-in protection
- ✓ Lighting and climate control
- ✓ Messaging and location

The IP500 standard ensures the requisite cross-disciplinary interoperability that is, moreover, easy to implement using the BACnet and IP500 interoperability specifications.

IP500 Wireless Platform for Commercial Office Buildings

Simple planning and installation

- ◆ Interoperability between all IP500 sensors
- ◆ Same gateway for comfort & Security Sensors

Secured and redundant infrastructure

- ◆ Fault-Tolerance by IP500 Network structure
- ◆ Systematic replication of data in IP500 network

Integration in redundant control units

- ◆ Redundant and secure data management
- ◆ Open and interoperable interfaces
- ◆ On demand cloud services to user interface

POWER OVER ETHERNET

Power Over Ethernet (PoE) receives power and data over a single standard Ethernet cable, eliminating the need for separate power cabling. With the simple click of a connector, PoE become part of a complete, integrated connected lighting system, delivering extraordinary lighting experience. With integrated sensors, PoE can track activity patterns, daylight levels, humidity, CO₂, temperature, or other data. This data allows deep insight into building operations, helping them optimize the delivery of resources, enhance the experience and performance of occupants, and support improved asset management.

- World's most innovative and patented technology to house up to 36 PoE dimmable driver circuits in 1U rack; connected on back end with Local Area Network and A.C. 230V power supply
- This rack provides all safety features to ensure that modulated and clean D.C. power (24V to 48V) is supplied to up to 36 LED fixtures (without drivers and RJ45 jack)
- Since LED is naturally dimmable, this rack can dim any of the circuits with TCP/IP programming offering Industry's first dimming system, which does not need expensive dimmable drivers and complicated dimming systems. If required, same Centralized unit also offers DALI and DMX dimming as well

LED Lighting with driverless fixtures, you can achieve

- Slim and light fixtures as driver is not required to be accommodated in the fixture
- No earthing required at fixture level
- Fixtures can have mixed CCTs as two circuits, easily controlled to achieve dynamic CCT
- No one is required to reach to fixtures for maintenance as no drivers are there
- Dimming is no more an expensive & complicated affair; 100% areas should be dimmable to achieve true energy saving

System design & features

Smart networked hubs connected to LED lighting and controls

- Utilises standard RJ45 Cat 6a structured cabling
- Network hubs and end-point can be upgraded anytime
- Reduced commissioning costs, can be located 40m+ from the fixture
- Simple low voltage wiring required, Supports multiple dimming control protocols
- Cut installation costs as electricity run over Ethernet cable
- Reduces the need for large distribution boards
- High performance, flicker free, deep dimming of LEDs Long-life LED output stages as this technology has removed output stage electrolytic capacitors
- Very high efficiency output stages to allow world's highest density centralised power solutions in 1U size

CENTRAL VACUUM CLEANING

ME Universal Engineering and Trading is one of the few companies in India that has introduced state-of-the-art cleaning technologies - Central Vacuum System, industrial cleaning systems, professional cleaning machines - for commercial and industry cleaning.

Efficient, fast and thorough, vacuum cleaning has become an essential part of housekeeping at corporate environments today. The Central Vacuum System (CVS) offers effortless cleaning while powerful industrial cleaning systems deliver comprehensive cleaning at higher efficiencies, bringing benefits like

- ✓ Improved convenience
- ✓ Better functionality
- ✓ More safety during use
- ✓ Energy saving and
- ✓ Reduced cleaning time

The key to achieving the full range of benefits comes from having a specialized understanding of what each commercial or industrial working environment requires. With ME Universal's trained technical support combined with our portfolio of industry-leading central vacuum and cleaning technologies, you are sure to get the optimal solution for your needs

Simple, Powerful Commercial and Industrial Cleaning Solutions

We offer a wide range of cleaning solutions across all types of cleaning, dry or wet including technologies, equipment, and cleaning agents.

Our approach is end-to-end starting from design to execution:

- ◆ Estimate the surface area to be cleaned and the type of cleaning required
- ◆ Estimate the personnel using the cleaning equipment in typical cases
- ◆ In case of CVS,
 - ◆ Design the pipe layout and vacuum tubing fittings plans
 - ◆ Next choose the right vacuum unit and location of the unit and the inlets

ME Universal Engineering offers a unique 24 x 7 Technical Support service for the CVS solution, which ensures that any problems you may face is handled at the earliest.

Our team of experts will recommend solutions based on your individual needs after studying on-ground requirements and incorporating the highest standards for hygiene and safety.

Cleaning Technologies That Deliver Value

Deploying the right cleaning system has a long term impact on not only the working environment but also the efficiency and quality of housekeeping operations. A well-planned cleaning system incorporating the latest technologies must be a foremost concern while designing a building.

Speak to our representatives to understand how you can benefit from having a highly productive, safe and fast cleaning solution.

COMMERCIAL & INDUSTRIAL LIGHTING

ME Universal Engineering specialized services in Commercial & Industrial Lighting delivers solutions that fits your specific needs.

Great lighting plays a major role in creating the right atmosphere and environment – whether a corporate office, a hotel, a retail store or a hospital. With the correct technical design and lighting installation it becomes easier to achieve

the right mix of aesthetics, functionality and durability.

Today energy-efficient LED (Light Emitting Diode) lighting is being increasingly adopted due to many advantages. As a technically-advanced lighting system it supports customized lighting solution designs in line with varying needs with a high degree of precision.

Advanced Cost-Effective Lighting Technologies That Deliver Productivity Benefits

ME Universal's experienced team of lighting engineers have wide exposure in developing industry-specific solutions. Our solutions reflect the understanding that the right lighting can make or break the ambience of your space.

We appreciate that every project is different and unique in its requirement. Our focus is on developing customised Innovative solutions that incorporate design aspects without compromising on desired utility to create lighting solutions that are high performance, low maintenance with energy-savings.

ME Universal's unique end-to-end approach ensures superior solutions with minimal hassle, relieving you of the stress:

- ✓ Our team of experts spend time in understanding the project's structural needs and client preferences or design intent as a first step
- ✓ Based on this understanding, a comprehensive solution comprising detailed designs and product recommendations is developed by the team
- ✓ The solution is fine-tuned and finalized using client inputs after in-depth discussions to ensure it addresses key project requirements
- ✓ We initiate the implementation phase and supervise the installation ensuring correct deployment of the solution, in line with our quality standards

Depend On Us for Your Lighting Needs

As experts we bring our deep knowledge of lighting products and technology to develop solutions that solve your illumination requirements. Our portfolio of lighting products is extensive and contains some of the most advanced lighting solutions available today.

Speak to our representative to see how we can help you install the best lighting solution for your commercial complex.

AIR COOLING, VENTILATION & COMMERCIAL REFRIGERATION

The microclimate inside commercial complexes influences the productivity of the workforce and machinery among other factors.

Creating the right indoors climate requires a deep understanding of various factors including outdoor temperature, building temperature, regulatory energy standards and optimal indoor climate. For maximum efficiency, the ventilation system must be integrated with the overall building management system.

The complex web of parameters involved requires experts to carefully develop a solution that can provide an easy yet comprehensive system to maintain the right indoor climate, offering control over:

- Temperature levels
- Air quality
- Humidity aspects
- Air flow currents
- Energy efficiency
- Dust protection

We are experienced engineers and offer cutting edge product solutions. Our clients gain the benefits of the optimal Air Cooling and Ventilation systems which are cost effective, economical and budgetary based solutions.

Comfortable Microclimate with High quality Cooling and Ventilation Solutions

ME Universal's product portfolio comprise the full range of cooling and ventilation solutions for commercial complexes like corporate offices, warehouses, hotels, factories workshops, using low capex products like:

- ◆ HVLS Fan
- ◆ Industrial Coolers
- ◆ Air Handling Unit
- ◆ Exhaust Fans
- ◆ VRV & Chillers
- ◆ Walk in Cold Rooms

Our engineers build a customized solution after understanding your business, the site conditions and your preferences, using industry-leading products from reputed companies to deliver ideal climate control.

Our responsible design engineers also ensure our solutions are environmentally safe by minimizing energy consumption and waste generated from the system

Customized and Innovative Climate Systems

With ME Universal's solutions for controlling the microclimate in your Esteemed Organization, you can be sure of gaining the benefits of the latest technologies.

Using our team of skilled engineers we not only handle the design, execution and maintenance but also upkeep via service warranty.

Reach out to our team to explore the optimum cooling and ventilation solution for your business needs.

FIRE, SAFETY & SECURITY

Fire prevention and a robust security system are no doubt an indispensable part of design plans for every commercial or corporate building.

Fire Protection Solutions cover

- ✓ Fire Prevention System
- ✓ Fire Suppression System
- ✓ Automatic Fire Detection
- ✓ Blast & Fire Resistant Door

The ideal fire protection system will offer reliable performance at the time of need without affecting the aesthetics of the building. As a legal necessity, companies have no leeway to make an error in this critical aspect.

Safety & Security products cover

- ✓ CCTV Surveillance
- ✓ Guard Patrol System
- ✓ Access Control System
- ✓ Public Addressal & Background Music System
- ✓ Emergency Evacuation Chair

By deploying a customized security system, businesses can be confident of protecting their property and managing the risks in a responsible manner.

Full Range Protection for Your Premises with Great Products

ME Universal has been installing carefully engineered state-of-the-art fire and safety protection systems leveraging products from top global companies, eliminating the risk of fire, material losses, and downtime.

Our professionally trained experts usually handle the entire range of the requirements:

- ◆ Assess the building structure and its history to understand the nature of flammable dangers existing in the building structure and business activities
- ◆ Design a customized solution for a comprehensive fire protection in line with local laws, building regulations and clients' design intent
- ◆ Commission and manage the installation process to ensure the final system adhere to quality and safety standards

In terms of Safety & Security, we offer Monitoring tools (My Inspector) which is a Guard Patrol & Verification System and essential CCTV Surveillance tools – wired and wireless, providing enhanced monitoring with recording facilities

Reach out to our representation for knowing how our industry leading products can safeguard your property.

INTEGRATED WASTE MANAGEMENT

Efficient waste management is a pre-requisite for maintaining high levels of hygiene, low maintenance costs and minimised environmental impact within commercial and residential complexes.

The benefits of moving away from conventional recycling designs to the new tech driven solutions are many:

- ✓ Improved operational handling
- ✓ Reduced manpower requirements
- ✓ Easier maintenance of facilities
- ✓ High sanitation levels
- ✓ Operational Cost reduction
- ✓ Easier Segregation of waste

For commercial properties in particular designing a waste management system that covers all critical aspects while having the flexibility and robustness to handle increasing demands on it requires the use of proven technologies and technical expertise.

ME Universal Engineering and Trading offers a comprehensive portfolio of the world class high-tech products and solutions for companies to manage their recycling needs. We custom design waste management installations for our clients putting together the most ideal solution for their specific needs.

Technology Driven Waste Management Solutions

Being environmental responsible is becoming a priority today and so investing in world-class waste management systems that are both economically and environmentally sound makes sense in the long run.

With its waste-nothing approach to resource management, ME Universal develops a fool-proof solution design that helps our clients manage its recycling programs in an efficient manner.

Garbage Chute System

Removes the need for manual removal and handling of garbage in multi-storied complexes. Also available Linen Chutes for hotels, and Debris Chute for construction sites for hassle free management

Waste Compactors

Backed by high end tech, waste compactors intelligently manage the waste collection process through sensors and analytics powered optimisation . It contains an inbuilt feature to compact waste upto 8 times

Underground Waste System

An innovative solution that adopts a Deep Drop system in which garbage bins are situated underground eliminating unsightly garbage sites in large public areas like crowded roads, airports etc.

Composting System

With effective composting systems, commercial complexes are able to recycle biodegradable waste material cleanly and efficiently. We offer highly engineered and dependable system for easy management

We Deliver A Recycling Solution that Works

Given the wide range of solutions available, it becomes imperative that the right system be adopted for maximum benefits.

ME Universal's team of experts will use its in-depth understanding to install the waste management solutions that will fit your needs.

Find out how our speciality products can help you take control of your complex's waste management .

SEWAGE & WATER TREATMENT

A Sewage Treatment Plant (STP) is an integral part of a waste management system and helps in recycling waste water for other uses. Installing the right sewage and wastewater treatment plants require a careful understanding of the site condition, occupant usage patterns and statutory environmental requirements.

ME Universal Engineering and Trading brings wide range of solutions particularly for Small Community Plants, cluster of home sewage treatment plants, medium sized communities, and larger wastewater treatment plants.

These plants are capable of handling any form of wastewater including :

- ✓ Domestic and municipal sewage
- ✓ Industrial kitchen wastewater
- ✓ Residential/Individual homes waste
- ✓ Restaurants sewage

Comprehensive and Robust STP Solutions

Every industry and every business has different sewage water composition and our experts use their technical understanding to design and build the STP that will serve their needs not only today but in future as well.

ME Universal Engineering offers its clients STP solutions that are designed by experts with in-depth knowledge and understanding of the latest sewage treatment standards and technologies.

Our plants can be designed to handle whatever be your end requirements for the waste water – clean water for reuse in garden, laundry or for flushing.

- Fully automatic, sensor based control
- Chemicals free, biological system
- Minimal dependence on electrical parts
- Simple, robust design using best practices

By understanding your needs and collaborating with our partners our clients receive a wastewater & STP plant that is:

- Compliant with PCB norms among others
- Sustainable over long term usage
- Safe, for humans & the environment

Affordable STPs that Perform Reliably in Tough Conditions

With ME Universal Engineering, you can take advantage of STP solutions that are backed by local expertise and environment friendly technology. These systems are geared to perform with no operator control or chemicals, beating traditional sewage treatment systems.

Speak to our representatives to understand if this innovative solution can be the answer to your needs.

AUTOMATION & AUDIO VISUAL

The explosion in connectivity in recent times has led to smart solutions becoming mainstream at home and at business. Constantly-evolving digital technologies allow us today to control remotely almost all functions of an office or a factory - be it managing thermostats, security systems or the lighting.

Commercial automation brings with it many advantages including:

- ◆ Cost savings from efficiency & flexibility of operations
- ◆ One-touch operations leading to higher productivity
- ◆ Better monitoring and control of different
- ◆ Enhanced security inside and outside building perimeter
- ◆ Significant energy savings through smart controls

Much of these solutions leverage the ubiquitous wireless technology and the fast-growing Internet of Things (IOT) framework where smart devices communicate via sensors.

By deploying a tailored solution, companies will have an integrated control over a variety of systems allowing for better operational management, both for today and future demand

Bring in the Future with Cutting-Edge Home Automation Solutions

ME Universal offers the Indian market some of the most advanced products and solutions for automating commercial and industrial solutions such as:

- ✓ Automated controlling system for lighting, tech set ups like video conferencing Commercial Lighting
- ✓ Automated control for audio-visual equipment, factory machinery and devices Fire, Safety & Security
- ✓ Centralised control of air-conditioning, shutters or blinds and curtains
- ✓ Integration of security & surveillance (CCTV) systems, paging or intercom systems
- ✓ Automated Background Music systems for large and small facilities
- ✓ Gate Automation - Boom Barriers, Bollards, Sliding Gates, Garage & Industrial Doors

ME Universal's product portfolio in automation brings together various aspects of an integrated control system.

- The first step is assessing your business requirements and the existing infrastructure
- After receiving go-ahead from you, we handle the implementation end -to-end

With intelligent automation, a near-total elimination of manual intervention in managing the complex web of facilities in a building is enabled.

Our experienced technical team will collaborate with you to design the best suited framework of solutions to fit your automation needs.

- Our experts will develop a customized solution with the best products for your needs
- We also offer after-care support through our extended warranty offering

Explore the next-gen solutions that ME Universal can offer you.

DIGITAL SIGNAGE & WAY FINDING

Now more than ever, being unique in the highly competitive market is of the high essence. Besides offering great products and services, to be ahead in the industry, a brand needs to have a compelling message and the perfect avenue for conveying that message. Digital signage and wayfinding is a crucial tool for businesses who wish to stand out in the industry and cement their brand name in the minds of the audience.

Reach Larger Audience with Digital Display

Now more than ever, being unique in the highly competitive market is of the high essence. Besides offering great products and services, to be ahead in the industry, a brand needs to have a compelling message and the perfect avenue for conveying that message. Digital signage and wayfinding is a crucial tool for businesses who wish to stand out in the industry and cement their brand name in the minds of the audience.

- ✓ Led Video Wall
- ✓ Digital Kiosks & Touch Screens
- ✓ Digital Menu Boards
- ✓ Digital Signage & Way Finding
- ✓ Mirror TV
- ✓ Kinetic Led display

ME Universal have the latest state-of-the-art machines and equipment and work with specially trained experts, and we combine our equipment and expertise to develop innovative and robust plans that revolutionize our clients' marketing efforts and ensure our clients stay at the forefront of the industry.

We have a multifaceted approach to digital signage which includes;

- ✓ Design Consulting & Estimation
- ✓ Inhouse Fabrication
- ✓ Installation & Maintenance
- ✓ Content management advisory

Communicate with Stunning Animated Visuals, using Digital Signage

ME Universal hands-on installation and maintenance team and customer care personnel are customer friendly and are on 24-hour standby to ensure your brand is always live. We start our process by spending quality time with the client discussing the brand's goals and evaluating different options for better results. We stay with our clients all through the process and after saving you time and giving you maximum ROI.

We work on a broad range of projects and in diverse industries including the banking, oil and gas, manufacturing, telecommunications, insurance, education, finance, hospitality, digital marketing industries among others. We attend to all levels of business, and we provide the best.

INSTALLATION AND EXTENDED SUPPORT

Installation

Remaining true to our promise to be your reliable partner, we not only design but also handle the actual installation of the project design recommended by us. With our oversight, the solution is delivered as envisioned and without any deviations or quality issues.

Extended Warranty

ME Universal Engineering and Trading is committed to providing continued high quality support to our customers. We go beyond the Manufacturer's Warranty and offer an extended warranty of up to 5 to 10 years for all our solutions and in some cases Lifetime warranty is also offered.

UNICARE is our dedicated unit that handles any issue that may arise in any of the products deployed as a part of the solution. Currently there are two locations in South India out of which we service our clients.

Our UniCare team comprises technical experts across the different categories who offer support 24x7 in both online and offline format. They are trained with inputs from the manufacturers ensuring accurate and in-depth knowledge of the products in question.
