Design your life!

Our Door Locks is called Third generation which came after 1st and 2nd generation which means old conventional and traditional door locks although are familial hundred years. Broke ordinary design concept, we materialized new genre of expression, whatever design available on our Handle.

Special Points

1. Convenience: With hand carry, easy to open by push or pull.
2. For elders, children, handicapped: It works real help for them when come in and out.
3. Safety: In emergency, urgent escape is available and save time for living.

Endurance

It will bear up until you are boring with it.
